

# SHARPLES

## Bottom Stripper

**Creative.**  
**Intricate.**  
**Exceptional.**

Detailed stripping jobs require a custom bottom pin tool that can save precious press set up time. Sharples bottom strippers are engineered to work in conjunction with all other tooling, designed to have scrap drop out properly and pull it out of the way. Sharples' engineering, planning, and design can assist structural design and prepress with tools that can be utilized to work on multiple layouts. Sharples can also design small sections to mount to existing frames. The strippers can remove small scrap or scrap that is too close to use standard bottom pins.
