

# SHARPLES

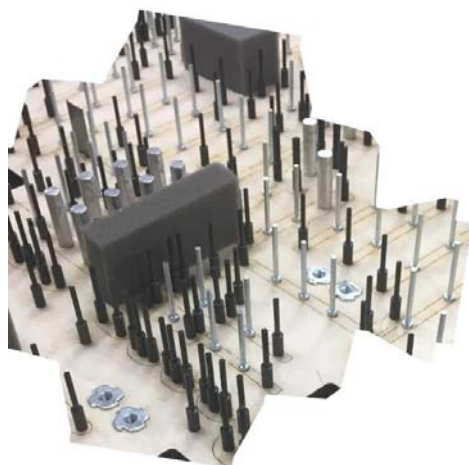

## Dynamic Stripping

**Creative.**  
**Intricate.**  
**Exceptional.**

Power stripping virtually eliminates the need for bottom pins. Sharples follows industry machine specifications in design and manufacturing to produce the optimal stripping unit that will work in today's high-speed, sheet-fed machines. We have experience with various difficult stripping layouts and different stock types. Unique capabilities including steel and laser cutting enable us to provide custom stripping rules and steel inserts to help our customers strip out the most detailed scrap areas and run at high production speeds.

Sharples can set up unique standards that work with your company's requirements. We merge preferences to work with current machine specs, that is a Sharples customer service standard.

- ◆ Dynamic Stripping with few or no bottom pins needed.
